Class V

EVS

Project Work

1 Collect the pictures of five extinct and five endangered animals. Paste these picture on a chart paper and also write the main reason for their extinction or endangerment.

2 Create model of kutcha and pucca house using waste materials.

3 Project Question:

Can you collect and identify different types of monocot and dicot seeds around you?

Instructions:

1. Collect at least 3 monocot seeds (like corn, rice, wheat) and 3 dicot seeds (like beans, peas, mustard).

2. Put each seed in a small ziplock bag to keep it safe.

3. Label each bag with the seed name and whether it is monocot or dicot.

4. Paste the ziplock bags on a colorful chart paper.

5. Write a short description below each group:

What is a monocot seed?

What is a dicot seed?

List 2 differences between them.

Optional Bonus: Draw or paste pictures of the plants that grow from these seeds!

6 Find 5 questions and answers of each chapter 1,2,3,4,5.

7 Learn questions and answers of all chapter 1,2,3,4,5.
